

Non-Executive Board Member (Voluntary)

Deadly Science Ltd

About Deadly Science Ltd – Referred to as Deadly Science

Deadly Science was established after Corey Tutt identified that remote schools were often critically under-resourced, particularly to resources relating to Science.

Deadly Science's vision is to ensure all schools, communities and youth organisations have access to the best possible resources to enhance the knowledge and pathways of children around the different sciences, including the sciences, from and through the lens of our First Nations communities.

In the last two years, Deadly Science has become one of the fastest-growing charities in Australia. It has attracted significant interest from individuals and sponsors who want to support the Deadly Science vision.

About the Board

The Deadly Science Board is responsible for establishing Deadly Science's purpose and values and setting the strategic direction.

It also establishes governance policies that provide the framework for the management of Deadly Sciences' financial, human resource, and asset management and ensures that internal processes and procedures are designed to provide adequate controls that serve as the basis for reporting to the Board as required.

The Board monitors management and organisation performance against Board-established criteria. The Board also identifies and monitors the management of organisational risks and ensures that the organisation complies with all internal and externally imposed compliance requirements.

The role of a non-executive director (voluntary) at Deadly Science

- Contribute to the strategic direction of Deadly Science and decide upon the organisation's strategies and objectives in conjunction with the CEO and COO
- Monitor the strategic direction of Deadly Science and the attainment of its strategies and objectives in conjunction with the executive.
- Monitor the operational and financial position and performance of Deadly Science
- Assure a prudential and ethical base to the conduct and activities of Deadly Science having regard to the relevant interests of its stakeholders.
- Assure the principal risks faced by Deadly Science are identified and managed;
- Ensure that Deadly Science affairs are conducted with transparency and accountability.

Competencies, Attributes, Qualifications

Specifically, we are seeking to fill a Director Position with the following expertise:

- **Understand of or experience with the needs of Indigenous communities**
- **Not-for-profit charitable organisations**

Other mandatory criteria include:

- Demonstrated passion for promoting STEM and other opportunities to remote schools and Indigenous communities
