

DEADLY FRIENDS

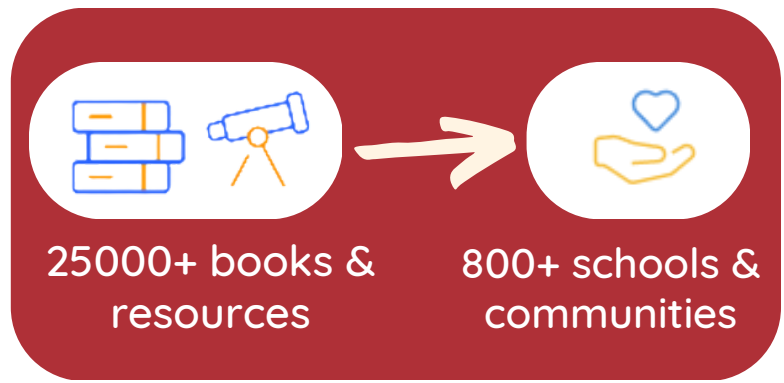

Make Your Impact

DEADLY
science

2023

DeadlyScience pays respect to the Traditional Custodians of the land, Elders past and present, and First Nations people everywhere. First Nations people have used science for over 65,000 years. Our culture is the oldest in the world. The first scientists passed on the lessons of the land, sea and sky, to the future scientists of today through stories, song and dance. We call this caring for Country. If you care for Country, the Country will care for you.

Social Impact

At the end of a hands-on activity where students were using practical engineering skills and connections with natural sciences, a student who had difficulties with engagement in science, offered this:

"You know what I think of when I hear DeadlyScience?"

"This!"

Programs

HOW WE DELIVER	ENGAGEMENT	EDUCATION	ENROLMENT	EMPLOYMENT
Resourcing	DEADLYSCIENCE CLUB DeadlyScience Club is for teachers and students. It is designed to support STEM learning with a focus on Aboriginal and Torres Strait Islander students. - Deadly Learners - Deadly Weather - Deadly Labs - Deadly Grants - Deadly STEM in Schools - School of the Month - Resources in Language		DEADLYSCIENCE PATHWAYS The Pathways program provides STEM career based opportunities such as career information days, workshops, work placements, training, internships, traineeships and scholarships to enable Aboriginal and Torres Strait Islander students to discover and connect with more opportunities in STEM fields. - Deadly Learners - Deadly Grants - Science Pathways - Technology Pathways - Engineering Pathways - Maths Pathways	
For students				
For community
