

SCHOOL OF THE MONTH

Boosting the engagement and education of students in regional and remote schools in STEM subjects.

THE ISSUE

Teachers in regional and remote schools often do not have access to expertise and resources to effectively teach the STEM syllabus compared to city based schools. This leaves Indigenous students at a significant disadvantage.

DeadlyScience offers a range of solutions to the problem, including resources, online and in-person STEM education sessions and STEM-based grants. To incentivise uptake of these programs we will reward a school each month with a prize package.

2000+
students inspired
and engaged

**Rewarding our
network of
800+
DeadlyScience
Schools**

OUR SOLUTION

Each month we will award a school/s as the School of the Month to acknowledge their commitment to ending STEM poverty.

Framework for Selection:

- Active engagement with DeadlyScience over the past 12 months
- Has participated in 2 x DeadlyLearner sessions
- Requested Resources
- Posted on socials tagging DeadlyScience at least 3 times
- Signed up for our newsletter
- Submitted 4 photos of students engaged in STEM activities

YOUR FRIENDSHIP

We are celebrating schools who have engaged on a deeper level by actively participating in programs we offer at DeadlyScience. The School of the Month will receive;

- \$1000 voucher to spend at Modern Teaching Aids on any STEM equipment
- Questacon gift box valued at \$440
