

## MEDIA RELEASE

### Fueling Indigenous Futures in STEM

DeadlyScience has been announced as one of the Official Charity Partners of the **FORMULA 1 ROLEX AUSTRALIAN GRAND PRIX 2024**. This partnership aims to **inspire** Indigenous youth to explore Science, Technology Engineering and Maths (STEM) professions by highlighting the varied possibilities of pursuing a career in STEM.

At the Grand Prix™, coming up in Melbourne from the 21st to 24th March, DeadlyScience will have the chance to introduce fifty Indigenous students from Box Hill, Lilydale District, Yarra Valley Education Plan and Shepparton to a range of career opportunities in STEM fields, as well as engage the broader community in hands-on experiments and talks from Indigenous STEM Legends in our Activation Centre in the Innovation Hub.

DeadlyScience CEO, Corey Tutt says: *"At DeadlyScience®, we understand the profound impact of representation, after all, 'you can't be what you can't see.' That's why it's important to offer avenues that **empower** and **inspire** Australia's First scientists to explore careers in STEM fields. The FORMULA 1 ROLEX AUSTRALIAN GRAND PRIX 2024 is a world class STEM showcase, providing students with a unique opportunity to witness the future of STEM roles, including engineering, data analysis, innovation technology and more. It's a pivotal moment for them to envision themselves as part of the evolving landscape of innovation and discovery."*

This opportunity aims to foster a more **inclusive** and diverse future in STEM fields by **inspiring** Indigenous learners to pursue a future career in STEM.
